# TruthOps Investigation Report — Corrected Calibration Rerun

**Case:** smoke4 · **Run:** run-20261010-195607 · **Date:** 2026-10-10 19:56 CDT
**Mode:** Fixture-backed calibration rerun — fixture corrected after primary-source verification

## Claim

Gasoline is now below $2.30 a gallon in most states.

*Notes: Smoke test 4: false specific number, true direction (prices down ~5%).*

> **Verdict: FALSE — 10/100**
> Expected band: 10–30 ✅ **IN BAND**
> Confidence: 0.97 → 0.97 (unchanged after contrarian review)

## Why this run exists

The original smoke4 fixture (Oct 10, earlier) encoded a verdict reconstructed from a search snippet: "FactCheck.org found the claim substantially accurate directionally (~$2.36)." That was wrong. Reading the full FactCheck.org article showed Trump "continued to **exaggerate** the decline in gasoline prices" — **no U.S. state** averaged below $2.30 (AAA; Oklahoma closest at $2.37) and the national average was **$2.94** (EIA). The $2.36 figure came from FactCheck.org's own correction note (the quote was corrected *from* $2.36 *to* "below $2.30 in most states"). The fixture, the evidence-plan stance ( `supports` → `contradicts` ), and the expected band (80–90 → 10–30) were all corrected, and the claim was rerun. This report is the corrected run.

## Scoring Factors

- Contradicting primary-source fact check (FactCheck.org, reliability 0.95)
- Source reliability × relevance per item
- Specific numerical assertion false in every state; directional component (prices down ~5%) noted but not credited against the false threshold claim
- PolitiFact Truth-O-Meter verdict scale (0–100 bands)

## Evidence

| ID | Stance | Score | Source |
|---|---|---|---|

| | | | |
|---|---|---|---|
| `ev-claim-1` | contradicts | 0.95 (rel 0.95 × relv 1.0) | primary, SYNTHETIC fixture — FactCheck.org verdict (corrected) |

## API Spend

No live API calls were made. All evidence is fixture-backed for benchmark comparability.
