TruthOps Business Plan (cfo.ai export)

Source: cfo.ai Business Plan workspace (Trilby Media) **Workspace:** https://app.cfo.ai/trilby-media-5c5e1736/chat/9fc4571f-9158-4cc9-bdc1-868d10f2c6d3 (requires sign-in) **Exported:** Oct 11, 2026 **Note:** The cfo.ai workspace went through multiple revisions during the Oct 10 session. Figures below are the stable set reconciled from screenshots. See RECONCILIATION.md for the full iteration history and conflicting figures.

Pricing Tiers

Tier	Monthly Price	Included Investigations	Overage
Starter	$499	25	$12/ investigation
Professional	$1,499	150	$12/ investigation
Enterprise	$3,999	400	$12/ investigation

Unit Economics

Metric	Value
Pipeline cost per investigation	**$1.08** (modeled — source of truth)

Metric	Value
Observed API spend (demo runs)	$0.00
Tier gross margins	88.01% / 88.17% / 90.07%
Fixed burn	$3,375/month

Runway

- **Horizon:** 18 months (Oct 2026 – Mar 2028)
- **Model:** Iterative financial planning in cfo.ai; runway figures varied across revisions (see RECONCILIATION.md). Stable inputs: tier pricing above, $3,375/mo fixed burn, $1.08/investigation pipeline cost.

Cost Breakdown ($1.08/investigation)

The $1.08 modeled cost covers: - Cloudflare Clef-flash sniff test gate (~$0.02) - Firecrawl web search + scraping (Alexandria primary sources) - GPTZero AI-text screening (secondary sources) - Sightengine image forensics (photo claims) - neatlogs trace export

Revenue Model

SaaS subscriptions with investigation-based tiers. Overage at $12/investigation provides expansion revenue. Target: trust & safety teams, newsrooms, platform integrity groups investigating high-risk misinformation claims.

Key Assumptions

1. Pipeline cost stays near $1.08 as volume scales (Firecrawl + detector API pricing stable)

2. Fixed burn of $3,375/mo covers infrastructure (SpaceFast hosting, domain, tooling)
3. No headcount modeled in v1 — founder-operated
4. 18-month horizon assumes steady tier mix; enterprise tier drives margin expansion to 90%+
