TruthOps Investigation Report

Case: smoke10 \u00b7 **Run:** run-20261011-204047 \u00b7 **Date:** 2026-10-11
Mode: LIVE run \u00b7 **Trace:** `unavailable`

Claim

The enterprise customer decline was 93%.

Notes: Atomic fact: is the specific magnitude correct?

> **Verdict: FALSE \u2014 10/100**
> Confidence: 0.97

Evidence

ID	Stance	Score	Reliability	GPTZero
`ev-decline_was_40pct-1`	contradicts	0.95	0.95	—
`ev-decline_was_40pct-2`	supports	0.06	0.12	ai P=1.0
`ev-decline_was_40pct-alex-3`	neutral	0.42	0.7	—
`ev-decline_was_40pct-alex-4`	neutral	0.42	0.7	—

Audit Trail (key events)

- [sniff] proceed=True — passed sniff test — coherent allegation, full pipeline warranted (backend=clef-flash)
- Decomposed into 1 atomic claims: ['decline_was_40pct']
- [director] decline_was_40pct: next action = gather — no evidence yet — gather before any judgment
- GET fixture://northstar/filing-q3-2026 -> 503 Service Unavailable (SIMULATED). State preserved; will retry.
- Retrying fixture://northstar/filing-q3-2026 after failure: HTTP 503 for fixture://northstar/filing-q3-2026: Service Unavailable (SIMULATED deterministic failure)
- [director] decline_was_40pct: next action = evaluate — evidence phase complete — evaluate the claim
- [director] decline_was_40pct: next action = escalate — initial verdict reached — escalate to contrarian for adversarial review
- Response plan built: FALSE. All external actions BLOCKED pending approval.

API Spend

Live API calls recorded: {'alexandria': {'calls': 2, 'credits': 0.0, 'usd': 0.0, 'operations': ['search+scrape']}}

Total spend: see breakdown

Approval Gate

All external actions BLOCKED \u2014 publish / post / notify awaiting explicit human approval.

Provenance: Pipeline sniff \u2192 evidence \u2192 scoring \u2192 contrarian \u2192 director. Repository: https://github.com/Mike-Demo/truthops \u00b7 Generated by TruthOps pipeline (neatHack 2026).
